Copy Cat #53

Narrative to accompany child's worksheet

Teacher completes the worksheet on the overhead as each student completes his/her copy at his seat. Copy Cat is typically completed whole group.

Once students learn the "copy cat" rhyme, they will chant along with you when you begin chanting.

Let's play copy cat just for fun. We'll copy Mrs. (insert teacher's name) she's the one. Whatever she says, we'll do the same, 'cause that's how we play the copy cat game.

Teacher says: ***Let's kiss our brains before we get started. It's important to use our brain when playing copy cat so it will remember how to print and make the sounds of our phonograms. Feet on the floor, backs building block straight, deep breath, eyes on me. Point to first phonogram. I say /sh/, you say***

Student says: /sh/

Teachers says: ***Watch me make sh.*** (Talk through and print the phonogram in the air using the correct formation of the letters as the students watch you. Since this is the first time making this phonogram in copy-cat, have the students practice making the letters in the air with their fingers as they talk through the correct formation with you.) ***Eyes on me.*** Trace the letters on your paper using correct letter formation and saying the sound of the phonogram as the students watch. ***Now you trace and say /sh/.*** (Talk the students through as they trace and say the sounds of the phonogram on their paper.) ***Now you know how to print and make the sounds of /sh/. Kiss your brain.***

Continue with same format while introducing both of the new phonograms. Once students have been introduced to the new phonograms, you can use a shortened version for the remaining ones as scripted below.

Teacher says: ***Point to the next phonogram. I say /ee/. You say***

Students say: /ee/

Teacher prints & says: ***Trace /ee/***

Students print & say: /ee/

Continue for remaining phonograms.

Copy Cat
#53

Pictures:

#1

Teacher says: Calling on a student, *what sound(s) does fruit begin with?* (allow a student to respond) **Correct** (If not correct, repeat word allowing student another opportunity to hear the beginning sound). When the student gives a correct response, teacher prints and says /fr/. Then the students print and say /fr/.

In book two, the beginning sounds focus on blends and phonograms (diphthongs). Have students circle the two letter combination if it is a blend and underline it if it is a phonogram/diphthong. Ask students, *does fruit begin with a blend or a phonogram/diphthong?* (allow a student to respond but correct them if he/she is incorrect) **fruit—circle “fr” (blend)**

Continue same format

#2 clock— circle “cl” - blend

#3 track—circle “tr” - blend

#4

Teacher says: Calling on a student, *what is the picture?* (*deer*—help identify picture if necessary) **Sound it out.** (Allow the student to sound out the word independently, but assist if he/she struggles.) Write each sound on the line as the student gives them to you- one sound on each line. (*d-ee-r*) Students copy you by writing the sounds on their lines. Once you have written the word, go back with the students pointing to each sound, saying them again, and then blending them together to hear the word.

Continue same format with questions #5-9

#5 d-i-sh...underline “sh” which is a two letter phonogram

#6 s-k-a-t-e...circle “sk” which is a blend

...double underline silent e; it’s job is to tell “a” to make it’s second/long sound

#7 c-r-ee-k...circle “cr” which is a blend

...underline “ee” which is a two letter phonogram

#8-s-n-ee-z-e....circle “sn” which is blend

...underline “ee” which is a two letter phonogram

...double underline silent e; it has no job in this word

****Other suggestions:** As you teach the various phonemic awareness skills, use the pictures to incorporate these skills. ie: clapping syllables & identifying/printing ending sounds.

****After you complete the worksheet, you can give a rhyming word and have the students identify the correct picture.** ie: say rake and have students identify cake.

****You can have the students trace the numbers as you go along.**

****Once finished with the language arts portion, you can add a math component.**

IE: Tell me the picture that is on number 5, which picture comes between 2 and 3, which picture is one more than 4, etc.

#2 bride— circle "br" - blend

#3 frog—circle "fr" - blend

Copy Cat
#54

#4—9

Teacher says: Calling on a student, **sound out the word**. (Allow the student to sound out the word independently, but assist if he/she struggles. Students should work on blending the sounds together after they have sounded it out.) Have the students go back, trace each letter and mark the words as indicated below. Then ask **which picture does that word match?** Have the students draw a line to match the word and the picture.

#4 nut—no markings— all single and/or first sounds

#5 rose—double underline silent e and draw a line with arrow to “o” to indicate that silent e’s job is to make “o” say it’s second/long sound

#6 tree—underline two letter phonogram “ee”; circle “tr” which is a blend

#7 bee—underline two letter phonogram “ee”

#8 shot—underline two letter phonogram “sh”

#9 ship—underline two letter phonogram “sh”

****Other suggestions:** As you teach the various phonemic awareness skills, use the pictures to incorporate these skills. ie: clapping syllables & identifying/printing ending sounds.

****After you complete the worksheet, you can give a rhyming word and have the students identify the correct picture. ie: say rake and have students identify cake.**
